to you to join the
event.**

The CMPA is holding this vital 1 hour webinar to inform Members on how to best stay ahead of the game when it comes to cyber security and data management. The presenter **Jason Brown** is the Principal Advisor on Risk and Security to the Board of Directors, Thales Australia and New Zealand. Before joining Thales in 2004, Jason had 27 years experience in Commonwealth Government. He is also a member of ISO/IEC Joint Technical Committee (JTC) Information Technology and JTC 27 Cyber Security.

This webinar is for owners, managers, supervisors and IT staff.

Presentation

Prevention – actions undertaken in advance. Sometimes this is referred to as mitigation or controls. Examples include; firewalls, endpoint monitoring, access controls, cyber awareness training, having alternative sources of electricity or alternative communication systems in place. Prevention activities should be happening all the time.

Preparedness – making arrangements, creating and testing plans, training, educating and sharing information to prepare personnel should a cyber-attack eventuate. These are also ACTIONS and they are happening all the time.

Response – the assistance and intervention during or immediately after an attack. Focus is on protecting lives and protecting business intellectual assets (buildings, roads, infrastructure). Usually measured in minutes or hours for cyber -attacks.

Recovery – the coordinated process of supporting the business, affected stakeholder communities providing digital infrastructure and restoration of business operations. Usually measured in weeks or months.

At the end of the session participants will have an understanding of the threats and the actions required to manage cyber related risk.

Please feel free to email questions for the presenter with your registration.
